HTML/CSS, JavaScript, TypeScript, Node.js, jQuery, Bootstrap, Tailwind, React.js, React Native, RESTful APIs, MySQL, NoSQL, MongoDB, Jest, Express.js, GraphQL, Heroku, Git, Visual Studio Code, NPM, Agile methodology.

PROJECTS

Artbot AI

- GitHub: <https://github.com/TheDanBrown/artbot-ai.git>
- Demo: <https://artbotai.herokuapp.com/>
- Summary: A MERN-stack application utilizing OpenAI API, Cloudinary API, GraphQL, and JWT to generate and store unique AI created images.
- Role: Full Stack - responsible for implementing both front-end and back-end components, ensuring seamless integration and optimal functionality of the application.

Book Finder

- GitHub: <https://github.com/khanhpbui/book-finder.git>
- Demo: <https://google-book-search.herokuapp.com/>
- Summary: An interactive book search application built using MERN-stack, Google Book API, GraphQL, and JWT for user authentication.
- Role: Full Stack - responsible for implementing both front-end and back-end components, ensuring seamless integration and optimal functionality of the application.

Give Manna

- GitHub: <https://github.com/frutaseca/Give-Manna.git>
 - Demo: <https://frutaseca.github.io/Give-Manna/>
 - Summary: A front-end web application created for a non-profit organization utilizing Materialize CSS Library, Accuweather API, and BlueCart API.
 - Role: API Integration - integrated various APIs into the project, ensuring seamless communication between different systems and maximizing the overall functionality of the application.
